Enoch Chu

Experience

LinQuest Corporation, El Segundo, CA —
Senior Software Specialist I - MSEIT Contract

01/2019 - Present

- Created, tested, and deployed integration between information systems to JIRA and Confluence (Angular, Python).
- Created scripts (Powerscript, Bash) to aid in deployments for both servers and users.
- Worked on deployments from code branch maintenance (Git) to deployments to production (Linux/Ubuntu).
- Gathered requirements for projects and converted requirements to actionable items for execution.
- Created technical training materials, diagrams, and documentation for consumers and team members
- Created and provided training to personnel from Agile experience to JIRA and Confluence.

Liferay, Inc, Diamond Bar, CA — *Software Engineer - Information Services: Engineering*

April 2014 - May 2018

- Provided front and backend implementation and technical solutions for Liferay Marketplace (Java, Java Servlets, JSP, CSS, Javascript, MySQL).
- Deployed marketing integration and automation for internal operations (Bash, Java, Java Servlets, and Python)
- Developed upgrades and maintained legacy code for Liferay Training Certification (Java, Java Servlets, JSP, MySQL, CSS, Javascript). Development includes providing RESTful web services for external teams to use and separating the service from the monolith into a microservice through the OSGI framework.
- Created technical training materials and documentation for consumers and team members
- Participate in code reviews that adhere to company standards
- Assisted Operations and QA teams in handling customer issues from strategic accounts
- Insured internal security by assessing attack vectors and enforcing company wide policies
